

Green Coffee Bean[™]

NATURAL CARB BLOCKING REMEDY

What is **svetol**?

SVETOL[®] is known as 'THE ORIGINAL GREEN COFFEE BEAN EXTRACT' and has powerful fat burning and body contouring properties that have been demonstrated in 2 clinical trials. Unlike generic or knock off green coffee bean extracts, only SVETOL contains naturally occurring chlorogenic acid and critical isomers of chlorogenic acid that make it effective. SVETOL is clinically proven to stimulate significant weight loss at a dosage of just 400mg/day.

Generic green coffee bean products are a waste of your money. They are spiked with synthetic chlorogenic acid and do not contain the naturally occurring isomers that make SVETOL effective. They also lack proof that they actually work. Only 200mg of SVETOL twice daily is proven effective for weight loss.

GREEN COFFEE BEAN... WHAT YOU NEED TO KNOW!

SVETOL[®] CUTS WEIGHT VIA 3-KEY BENEFITS:

- Improves body shape and firmness by improving lean to fat mass ratio
- Shuts down glucose pathways so you can burn fat more easily
- Decreases intestinal glucose absorption

Medicinal Ingredient Facts

Serving Size: 1 Capsule	
Servings Per Container: 60 (30 Day Supply)	
	Amount Per Serving
SVETOL [®] French Green Coffee Extract (Coffea canephora robusta) (Bean)	200 mg
Providing: 100 mg (50%) Chlorogenic Acid	
Providing: 20 mg 3, 4 & 5-Caffeoylquinic acid Diisofeyulic Quinic Acid	
Non-Medicinal Ingredients: Natural base of 295 mg Calcium (as citrate/carbonate), (supplying 117 mg of elemental calcium), K-CAPS [®] Vegetarian capsule (Hydroxypropyl methylcellulose) (Kosher & Halal Certified), Silica (Natural mineral source).	
DOES NOT CONTAIN: Magnesium stearate, microcrystalline cellulose, soy, gluten, nuts, dairy or fish.	

Recommended Use of Purpose: Helps promote weight loss.
Recommended Dosage and Directions: Take 1 capsule twice daily (total of 400mg) before your two largest meals on an empty stomach with a glass of water. For even faster results combine with NutraCentials Cissu Quadrangularis NX[™], Raspberry Ketones NX[™], African Mango NX[™], and Garcinia Cambogia NX[™] before meals. For best results combine with healthy eating habits and an active lifestyle. From the makers of WeightOP[™] - www.WeightOP.com

Warning/Risk Information: Consult a health care practitioner prior to use. For best results combine with healthy eating habits and an active lifestyle.

This bean has gotten quite a bit of media attention with serious coverage by a popular TV doctor. So why has there been so much coverage on green coffee bean in association with weight loss and what do you need to know about this nutrient?

It is actually the chlorogenic acid and the active isomers of chlorogenic acid that make green coffee bean a powerful weight loss solution as it has the ability to block the usage of carbohydrates in the body. When carbohydrates are made less available in the body, the body becomes a fat burning machine because the

body must fuel itself and does so by burning stored body fat. This is precisely why green coffee bean has received so much media attention and has literally been hailed as a "miracle fat burner".

What people fail to realize is that not all green coffee bean extracts are created equal. When purchasing a green coffee bean product it is very important to read the label carefully.

You should not only be looking for your product to be standardized for chlorogenic acid but also the active isomer of chlorogenic acid known as 5-caffeoylquinic acid. This isomer must be present in a ratio of approximately 5:1

"Not all green coffee beans are created equal and you must look for a specific ratio of chlorogenic acid to isomers of chlorogenic acid for weight loss success"

chlorogenic acid to 5-caffeoylquinic acid. In other words for every 100 mg of chlorogenic acid you must have approximately 20 mg of 5-caffeoylquinic acid present. If you do not see these two compounds on the label in this exact ratio you are not getting the authentic green coffee bean material shown in 11 published clinical studies to be both safe and effective. Only SVETOL[®] green coffee bean extract is standardized to

contain this precise 5:1 ratio that was shown in a double blind placebo controlled study to help test subjects lose between 11-14 pounds in 60 days when 200 mg of SVETOL was taken twice daily before your two largest meals. Bottom line, do not purchase a product only standardized for chlorogenic acid without the isomer as this critical isomer acts like the key that opens up this powerful weight loss nutrients effects!
